

OMC ROLLING OUT A NEW ELECTRONIC HEALTH SYSTEM

FOR IMMEDIATE RELEASE

January 25, 2024

Outpatient Medical Center will be rolling out a new electronic health system beginning on February 6th, 2024.

“After years of planning and successfully acquiring grant funding, OMC is excited to roll out a new and modern electronic health system. The system will be user friendly and will improve healthcare delivery and record keeping,” said Dr. Mark Guidry, OMC’s CEO.

As a Federally Qualified Healthcare Center, an electronic health system is important to maintain compliance with healthcare standards and to be able to report on quality-of-care measures for the patients that we see. OMC staff in Natchitoches, Tallulah, and Leesville will undergo training from January 29th to February 2nd. We ask the public and patients to bear with us through a temporary inconvenience as staff are being trained that week. We look forward to using our new system starting on February 6th.

The new Athena health system includes many features that will vastly improve the ease of scheduling appointments, registering for appointments, and keeping up with medical records.

“It is exciting to see OMC achieve this accomplishment that we have worked so long and hard for,” said Tommy Roque, President of OMC’s Board of Directors, “The cities we serve have great need, and this is good news for the patients we serve.”

OMC is an option for you, because caring for you is what we do! For more information call the nearest OMC Clinic. More information on clinic locations and services can be found at www.outpatientmedical.org or by calling OMC’s 24/7 contact center at 888-811-8081.

OMC Board Member Melvin Holmes checks into his appointment, assisted by Patient Services Representative Jordan Mulow.
