

TGIF Provider Spotlight Week 7: Dr. Bobby Jones

For the past 41 years, Dr. Bobby Jones has served patients across the state of Louisiana as a general dentist and has spent the past 15 years at OMC Natchitoches. His healthcare philosophy is to “provide treatment in a caring and pain free manner in order to reduce patient anxiety and to encourage completion of needed treatment.”

Dr. Jones’ biggest piece of healthcare advice is for patients to keep routine dental visits so that dental needs do not become dental emergencies. “If caught early enough, we can often preserve a

patient’s dentition with simple restorative procedures and oral hygiene.”

Dentistry today is placing more emphasis in addressing the mouth/body connection. Dr. Jones encourages patients to treat any existing dental infections or gum disease as soon as possible, especially “if they have chronic medical conditions such as cardiovascular disease or diabetes.”

When Dr. Jones is not in the OMC clinic, he and his wife spend much of their time traveling and visiting family and friends.
