

OMC TO OBTAIN NEW COVID VACCINE

FOR IMMEDIATE RELEASE

Sept. 14, 2023

On Monday, September 14, 2023, the Food and Drug Administration approved an updated COVID-19 Vaccine which promises improved protections against the Omicron variant. The new vaccine provides better protection against serious consequences of COVID-19, including hospitalization and death.

Outpatient Medical Center is in the process of obtaining the new vaccine in order to best serve the public. Temporarily, COVID-19 Vaccinations will be postponed until OMC obtains doses of the new vaccines.

Patients desiring to receive a vaccine are asked to call their clinic (see list below) and be placed on a waiting list. Once OMC acquires the new vaccine, patients on the waitlist will be notified and scheduled for appointments.

Similar to the Flu, COVID-19 is a virus that mutates. The new vaccine is an mRNA vaccine has been synthesized to best protect against strains that are currently circulating, specifically the Omicron variant.

OMC is an option for you, because caring for you is what we do! For more information call the nearest OMC Clinic. More information on clinic locations and services can be found at www.outpatientmedical.org.
