

What You Need to Know: Getting a Referral from an OMC Provider

Your provider just ordered a referral to a specialist or for a diagnostic test.

It is important to follow through with scheduling your referral. OMC's care coordinators will assist you on how to select a specialist covered by your insurance or that meets your preferences. After you have selected a specialist, you will be given their contact information for you to schedule an appointment and to let OMC know of your appointment date.

Please know that most referrals will automatically expire in 90 days (after your provider's order). Even if your referral expires, you can make an appointment with your provider to consider reactivating the referral, if still needed.

To give us updates on your referral, you may call 318-357-2061 and leave a message for our referral coordinators or alternatively email us at: referrals@outpatientmedical.org

It is also your responsibility to have a copy of your referral record sent to OMC or to bring it back yourself. Having these notes are very important to your health care.
